

IN THE CLAIMS:

The text of all pending claims (including withdrawn claims) is set forth below. Cancelled and not entered claims are indicated with claim number and status only. The claims as listed below show added text with underlining and deleted text with ~~strikethrough~~. When strikethrough cannot easily be perceived, or when five or fewer characters are deleted, [[double brackets]] are used to show the deletion. The status of each claim is indicated with one of (original), (currently amended), (cancelled), (withdrawn), (new), (previously presented), or (not entered).

Please AMEND claims 14, 17, 18, 20, 25, 26 and 29, and CANCEL claims 1-13, 16, 19, and 31-35 without prejudice or disclaimer in accordance with the following:

1-13. (Cancelled)

14. (Currently Amended) An apparatus comprising:
a chamber to accommodate an article of clothing;
a humidifier to selectively supply moisture to the chamber and the article of clothing;
a heater to selectively supply heat to the chamber and the article of clothing;
an ozonizer to selectively supply ozone to the chamber and the article of clothing when an automatically detected odor level of the article of clothing exceeds a reference odor value;
and
an ozone disposer to selectively remove ozone from air drawn from the chamber;
a blower, communicating with the chamber to circulate an atmosphere of the chamber;
and
a controller to control the humidifier, the heater, the ozonizer, the ozone disposer, and the blower.

15. (Cancelled)

16. (Cancelled)

17. (Currently amended) The apparatus according to claim ~~16~~14, wherein:
the ozone disposer is connected to the blower, and is positioned between the blower and the chamber.

18. (Currently Amended) The apparatus according to claim ~~16~~14, further comprising:
a filter positioned between the chamber and the blower, to filter impurities separated from an article of clothing in the chamber.

19. (Cancelled)

20. (Currently Amended) The apparatus according to claim ~~49~~14, wherein the controller further comprises:

a control unit; and

a driving unit,

wherein the control unit accepts an input, and controls the driving unit to selectively drive the humidifier, the heater, the ozonizer, the ozone disposer, and the blower based on the input.

21. (Original) The apparatus according to claim 20, wherein:
the control unit accepts the input from a user.

22. (Previously Presented) The apparatus according to claim 20, further comprising:
a sensor unit to determine a condition of the chamber,
wherein the input is the condition of the chamber, and the control unit accepts the input from the sensor.

23. (Previously Presented) The apparatus according to claim 22, wherein the sensor unit comprises:

a humidity sensor;

a gas sensor;

a temperature sensor; and

an ozone sensor.

24. (Previously Presented) The apparatus according to claim 23, wherein:
when an article of clothing is placed in the chamber, the sensor unit determines a condition of the article of clothing based on the condition of the chamber, and the control unit controls the driving unit to selectively drive the humidifier, the heater, the ozonizer, the ozone disposer, and the blower based on the condition of the article of clothing, to selectively deodorize, dry, and remove a wrinkle from the article of clothing.

25. (Currently Amended) The apparatus according to claim ~~46~~14, further comprising:
a first duct, connected to the blower and positioned in a side wall of the apparatus; and
a vent, positioned on the side wall of the apparatus to communicate between the first duct and the chamber, and supply air ~~at a first pressure~~.

26. (Currently Amended) The apparatus according to claim 25, further comprising:
a second duct connected to the blower and communicating with the chamber to supply
~~air at a second pressure.~~

27. (Original) The apparatus according to claim 26, wherein:
the heater heats air passing through at least one of the first duct and the second duct;
and
the ozonizer supplies ozone to the chamber through at least one of the first duct and the
second duct.

28. (Original) The apparatus according to claim 26, wherein:
the first duct is an internal duct; and
the second duct is an external duct.

29. (Currently Amended) The apparatus according to claim ~~16~~14, further comprising:
a door to selectively open and close the chamber, wherein the door includes a
transparent member to observe an internal state of the chamber through the transparent
member of the door, while the door is closed.

30. (Cancelled)

31. (Cancelled)

32. (Cancelled)

33. (Cancelled)

34. (Cancelled)

35. (Cancelled)
